LICENSE AGREEMENT

This software is protected by copyright law and international copyright treaty. Therefore, you must treat this software just like a book, except that you may copy it onto a computer to be used and you may make archive copies of the software for the sole purpose of backing up our software and protecting your investment from loss. The software may be moved from one computer to another, so long as there is no possibility of it being used by more than one person at a time.

ADDING USERS

You may add users by paying for a separate software package for each user you wish to add. You may also add users by purchasing a site-license, so long as the number of persons who are able to use the software at one time is not more than the number of authorized users specified in our product or license.

TRANSFERRING THE SOFTWARE

You may transfer all of your rights to use the software to another person, provided that you transfer to that person all of the software, diskettes (if applicable), and documentation provided in this product (including this statement), and transfer or destroy all copies in any form. Remember, once you transfer the software, you no longer have any right to use it, and the person to whom it is transferred may use it only in accordance with the copyright law, international treaty, and this statement.

If you transfer this product to another person, the new user have no right to use our free support service even this product under free warranty period.

If you have purchased an upgrade version of the software, it constitutes a single product with the software the you upgraded. For example, the upgrade and the software the upgraded cannot both be available for use by two different people at the same time, and cannot be transferred separately, without written permission from Glorious Technology Co., Ltd.

Except as provided in this statement, you may not transfer, rent, lease, lend, copy, modify, translate, sublicense, time-share, or electronically transmit or receive the software, media, or documentation.

LIMITED WARRANTY

1. Glorious Technology Co., Ltd. provides 90 days free hot-line support from the original purchase date.
2. Glorious Technology Co., Ltd. warrants the product provided by Glorious Technology Co., Ltd. to be free of defects in materials and workmanship for a period of 60 days from the original purchase date.
3. The entire and exclusive liability and remedy for breach of this limited warranty shall be limited to replacement of defective media or documentation and shall not include or extend to any claim for or right to recover any other damages, including but not limited to, loss of profit, data, or use of the software or special, incidental or consequential damages, or other similar claims, even if Glorious Technology Co., Ltd. has been specifically advised of the possibility of such damages.
4. This warranty is invalid when the product has been damaged through misuse, negligence, accident, computer virus and natural calamities.
5. Glorious Technology Co., Ltd. is not responsible for the data which create or produce by the software.
6. Glorious Technology Co., Ltd. makes no representation or warranty that the software or documentation are "error-free", or meet any user's particular standards, requirements or needs.
7. Glorious Technology Co., Ltd. provides no warranty at all to any person, other than the Limited Warranty provided to the original purchaser of this product.
8. Installing and using this software indicate the purchaser and the users' acceptance of above terms and license agreement.

The invalidity or unenforceability of any provisions of this License Agreement shall not affect the remaining provisions hereof.

Chapter 1 Installation

1.1 Before installation

Before installation, please check the followings:

- a) Hardware requirements
 - Intel i3 or above CPU
 - 4GB RAM or above
 - 200MB HDD space for AccPower 3000 Pro installation. The space for data depends on the volume of your data. 200MB HDD space for data is recommended.
 - 1024x768 resolution
 - One USB port
- b) Operating System
 - Microsoft Windows 7, 8, 8.1, 10 or 11
 - Please use Administrator authority to log in the Operating System to install
- c) Folders for AccPower 3000 Pro and Data
 - Default folder for AccPower 3000 Pro is C:\APS3000PROV4. Normally, AccPower 3000 Pro should be installed in local hard disk, either single user version or network version, to enhance the performance.
 - If the data will be shared in network, please map the drive and share the security permission of data folder for Read, Write, Add and Delete.
- d) Create a company data
 - Set up Account Period carefully when create a company data. Account Period can't be modified after the company data created.
 - Set up some basic information for Customers, Vendors, Stocks, Payment Methods and Employee, etc.

1.2 Installation from CD-ROM

Please shut down all running programs before AccPower installed. Put AccPower CD into your CD-ROM. Figure 1-2 is displayed.

If Installation Program can't be automatically executed, please click [Start] button to choose Run function. Type D:\ARSSETUP (D:\ is CD-ROM) in dialog box. Of course, you can also execute ARSSETUP.EXE in AccPower CD by yourself.

* Please don't insert USB Software Dog into your computer before Installation Program completed.

Figure 1-1 Run screen in MS Windows

1.3 Installation Steps

After Installation Program being run, the interface for language selection will be displayed. Only matched with the language code of your MS Windows, the character set can be displayed correctly. Otherwise, non-readable character will happen. Please choose the correct Language:

Figure 1-2 Select Language screen

Click [OK] button after the desired Language selected. Then, go to next step:

Figure 1-3 Welcome screen

Press [Next] button to read license agreement.

Figure 1-4 License agreement

Press [Next] button to install AccPower Retailing System.

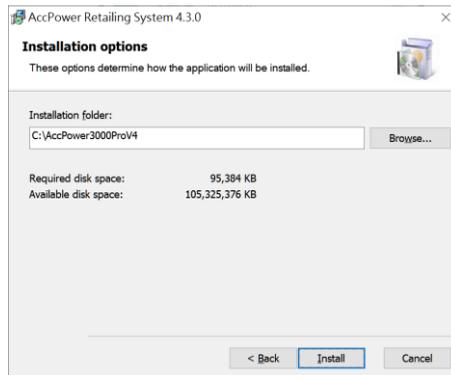

Figure 1-5 Select Destination Folder

Default folder for AccPower Retailing System is C:\APS3000PROV4. Click [Browse(R)] button for installation to another folder. Otherwise click [Install (I)] to install the system.

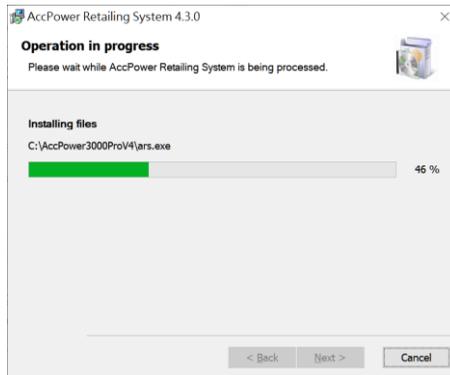

Figure 1-6 Installation in progress

Click [Next] button, AccPower Retailing System will be automatically installed. If AccPower Retailing System is successfully installed, the following screen will be displayed. Otherwise, you should install once again.

Figure 1-7 Installation Completed

Now, AccPower Retailing System installation has been finished. You are ready to Section 1.5 [Software Dog Installation] if single user version had been installed. Otherwise, please go to next section.

1.4 Network Version Installation

If AccPower Retailing System is used in local network, please execute the Installation Program in each workstation and create a company data with same data directory in server under Multi Company System. For example, you can create a company data with following data directory: Z:\APS3000PROV4\DATA\COMPANY01.

To create a company data which can be accessed automatically by other workstation, please refer to following steps:

- a) Search a file named APS4.INI in the folder of AccPower Retailing System installed (default folder is C:\APS3000PROV4).
- b) Modify the content by double click this file or use Note Pad of MS Windows.
- c) To add a line under [COMMON] by pressing [Enter] key.
- d) Type MCOMPATH=data directory in Multi Company System, such as MCOMPATH=z:\aps3000prov4\data. 'MCOMPATH=' is key word and 'z:\aps3000prov4\data' is data directory which is decided by the user.
- e) Save the file and exit.

* Please share the security permission of the data folder for Read, Write, Add and Delete.

Sample for APS3.INI: [COMMON]
 MCOMPATH=z:\aps3000prov4\data
 TempPath=c:\aps3000prov4\Priv
 Language=2

1.5 Software Dog installation

In AccPower Retailing System package, there is a hardware protection device - Software Dog that shall be inserted into USB port. Otherwise, it will be treated as a trial version. The trial version is just same as released version except there is a limitation, up to 100 records. Thus, if trial version had been installed, there is no need to install AccPower Retailing System again provided that the version is same and Software Dog is installed.

1.5.1 Installation Steps:

1. Install AccPower Retailing System firstly.
2. Insert Software Dog into USB port of the computer. Operating System will install Software Dog Driver automatically. During the process, you may be asked to press [OK].

If there is a problem, please search a file named MicroDogInstdrv.exe under Driver Folder in the folder of AccPower Retailing System installed (default folder C:\APS3000PROV4\DRIVER). Double click this file and press [Install Driver] to install Software Dog driver.

If there is no USB port of the computer, please contact us.

1.5.2 Un-installation

To un-install Software Dog driver, please search a file named instdrv.exe under Driver Folder in the folder of AccPower Retailing System installed (default folder C:\APS3000PROV4\DRIVER). Double click this file and press [Uninstall Driver] to uninstall Software Dog driver.

Chapter 2 Functions and Operations

2.1 Enter into System

Use mouse to click [Start] button and choose AccPower Retailing System in Programs or AccPower Retailing System icon in desktop.

Multi Company Control appears whenever you start the System. To add, delete or edit the information of one company data, please refer to Section 2.2 [Multi Company Control]. To enter into the System, please use the mouse to double click a company data or choose a company data and then click [Open a company data]. The System will automatically execute the initialization when the user is first time to the System. There are some basic information should key in. Of course, this information can be altered lately.

Next, Log On interface will appear (default user name and password is ADMIN and PASS respectively). And then, the interface for Company Information, Currency, System Number, Accounting Period and Tax File will be shown. Please input the information according to your company.

If [Change Password] has been ticked in Log On interface, Change Password interface will be shown after you are successfully log on. ADMIN is a user with the highest authority. It is highly recommended to change the password of ADMIN.

Figure 2-1 User Logon Screen

2.2 Multi Company Control

Multi Company Control is to handle different data files of different companies or different years. You should set up a company data firstly. If you want to explore the functions of the System, please press [Explore Sample Data].

2.2.1 Create a company data

Figure 2-2 will be displayed when you press [Create a company data]. Fill in relevant information, press [Save company record] to save the record and exit. To abort the record, just press [Cancel without save] to exit without save.

Company short name Company short name is the name of a company data and used for the name of data path. Please just use letter or number for company short name. The requirement for creating a name of data path, please refer to the requirement of your Operating System.

Accounting Period Description

It is to describe the accounting period, e.g. 2021/04/01-2022/3/31. It can be blank.

Data Path

The directory stores the data file, e.g. c:\aps3000prov4\data\sample1. The System will automatically set the data path as the directory of the System installed + data + company short name. For example, if the System is installed in c:\aps3000pro and company short name is accpower, the data path will be c:\aps3000prov4\data\accpower.

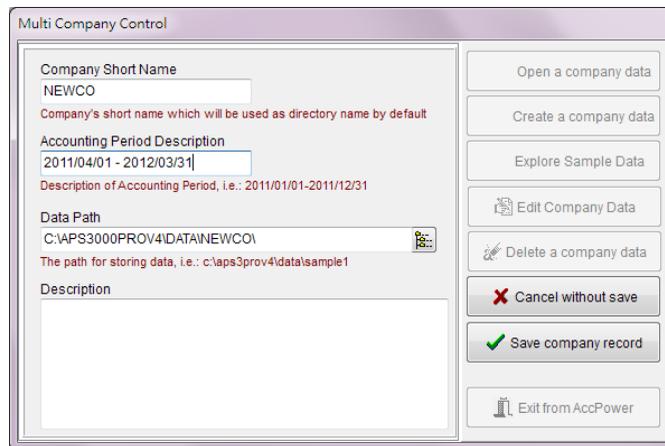

Figure 2-2 Create a company data

2.2.2 Open a company data

All company data are showed in Multi Company Control. Please use the mouse to double click a company data or choose a company data and then click [Open a company data].

2.2.3 Edit a company data

The existing company data can be altered by pressing the button [Edit company data]. There are some tips for your reference.

- a) Company Short Name can't be altered. You can delete the existing one and add a new company data to replace the existing one.
- b) If the data path is altered, the existing data will not be moved to a new directory. Moreover, the data in the original folder will not be deleted for security reason.

2.2.4 Delete a company data

To delete an existing company data, you can just press the button [Delete a company data]. However, the System will not delete the data in the original folder for security reason. If you want to delete the data in the original folder, you should do it via Operating System, such as Windows Explore.

If you have not deleted the data in the original folder and want to read the data again, you can just create a company data and type the data path as the original path.

2.2.5 Explore sample data

There is a set of sample data after the System installed. You can explore this sample data to learn the functions of the System by pressing the button [Explore sample data].

2.3 Exit System

Use the mouse to double click Exit icon on Functions bar or select Exit on Transaction menu.

Note: Please exit the System before shut down the computer. It may cause damage on data if the computer has been shut down or stopped inappropriately before exit the System.

2.4 System Functions

You can access system functions via Put Down Menu or Quick Access Area. All system functions can be found in Put Down Menu which is familiar to users. Quick Access Area allows you access primary functions quickly. We will elaborate system functions under Put Down Menu.

2.4.1 Transactions Menu

All transaction functions are found in Transaction menu.

2.4.1.1 Multi Company Control

Create a company data To create a new company data.

Open a company data To open an existing company data.

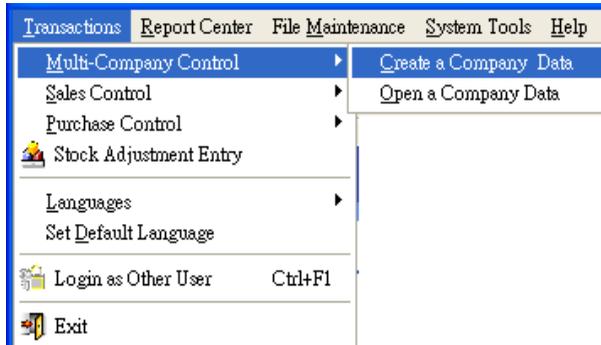

Figure 2-3 Multi Company Control

2.4.1.2 Sales Control

Quotation Entry To browse, add, edit or delete a quotation.

Sales Order Entry To handle customer's sales order.

Sales Invoice Entry To browse, add, edit or delete a sales invoice.

Sales Return Entry To handle sales return from customer.

Delivery Note Entry To handle the information of goods delivery. The content can be copied from sales invoice and modified partly by user.

Customer/Stock Last Price File

User can search the latest selling price sold of a stock for different customers in this file. The price can be modified.

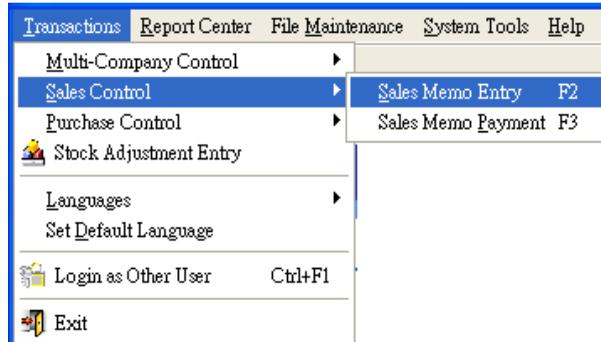

Figure 2-4 Sales Control Menu

2.4.1.3 Purchase Control

Purchase Order Entry To handle the purchase from vendor.

Vendor Invoice Entry To input vendor invoices and handle stock and A/P.

Purchase Return Entry To handle purchase return to vendor.

Vendor/Stock Last Price File

User can search the latest purchase price of a stock bought from the vendors. The price can be modified.

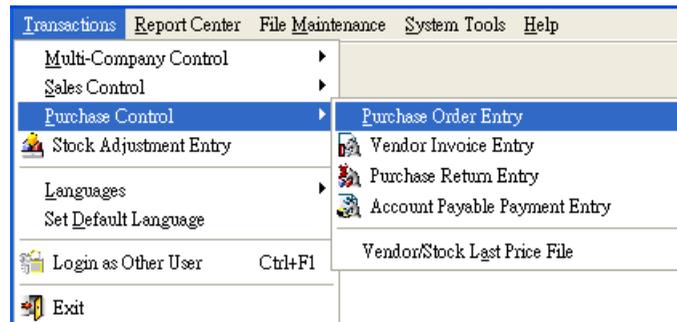

Figure 2-5 Purchase Control Menu

2.4.1.4 Stock Adjustment

User can adjust the quantity for individual stock in this interface. This function is to be used when the actual stock quantity is different from book balance caused by material loss, stolen, etc.

2.4.1.5 Other functions

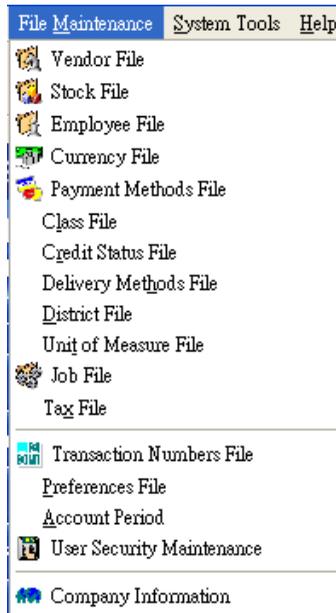

Figure 2-7 File Maintenance Menu

2.4.4 System Tools menu

- | | |
|---------------------|---|
| Backup Data | It is to compress the data to the target directory which can be floppy diskette, hard disk, CD-RW or ZIP drive. Of course, the device, you chose, should be supported by your Operation System.
If there are many data to backup, more than one diskette may be requested. Please place the diskettes with backup data in a safe place with right label. |
| Restore Data | This function is to restore the backup data to current directory. Please choose source driver and press [OK] button to restore data. If backup data in two or more diskettes, please insert the diskettes by order. |
| Transaction Auditor | When the database had been damaged or there was a problem in hardware, the outstanding of customers, vendors and stocks may be incorrect. This function is to correct such errors. |
| Year End | It is to bring forward the balance to next financial year. |
| Database Tools | There are three functions: Check and repair Data File, Delete Transaction files and Clear All data. |

Export Data to Other Format

User can export the data in AccPower Retailing System to other formats. The formats are up to 17 general formats.

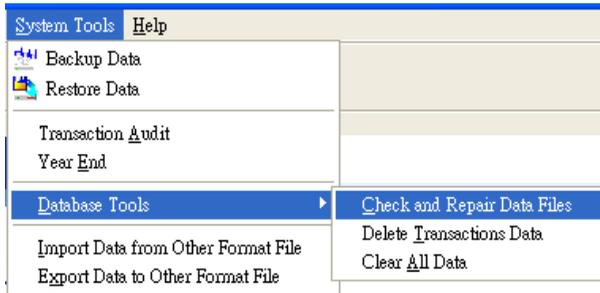

Figure 2-9 Utilities Menu

2.4.5 Help Menu

Contents

Online Help's main directory will be showed here. You can choose an appropriate item.

How to Use Help

The descriptions, for how to use Online Help, are provided by Operating System.

About...

To show software name, version, copyright, company name and contact method.

2.4.6 Quick Access Area

Figure 2-10 Quick Access Area

Quick Access Area is represented by buttons. You can access the desired functions directly by pressing the buttons. To point at the button by mouse, hints related to the buttons will be displayed.

2.5 Choosing and searching records

To be more simplification and precision, AccPower Retailing System uses Put Down Menu for user to choose the desired data. Here, three examples, date selection, put down menu and dialog box, are elaborated.

2.5.1 Selecting a date

In AccPower Retailing System, user can use the downward arrow beside date fields to call a calendar. For previous month, left side arrow should be pressed. For next month, right side arrow should be pressed. Finally, use the mouse to choose the desired date.

Figure 2-11 A calendar

2.5.2 Put Down Menu

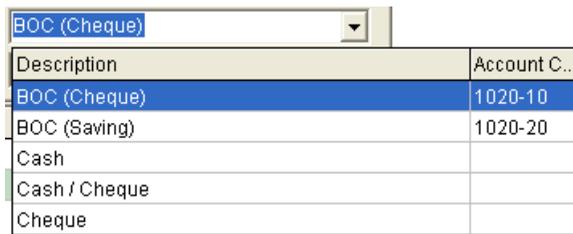

Figure 2-12 Put Down Menu

Put down menu is usually used in searching item by number. To press the downward arrow on right side, the desired data will be displayed. You can use the mouse to choose

one. Of course, you can input the data in the field by using keyboard. AccPower Retailing System will jump to the records related to the data your input. For example, if character “2” input, AccPower Retailing System will automatically jump to the records with “2” as the beginning.

2.5.3 Search Dialog Box

Search dialog box is used to search the records by more than one index, for example, invoices, customers or stocks, etc.

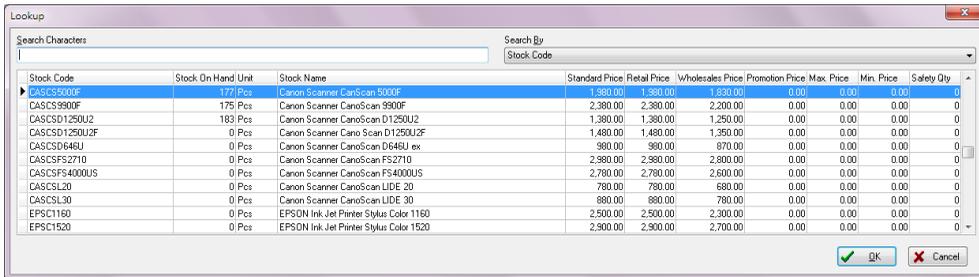

Figure 2-13 Searching dialog Box

To search a record, you should just input the appropriate data in “Search Character” field. AccPower Retailing System will jump to the mostly similar records. AccPower Retailing System uses incremental searching method. For example, if “AB” input, AccPower Retailing System will jump to the record beginning with “AB”. That is, if more information input, the showed record will be more precise.

If you want to change the search index, for example, searching a record by name, you can just press “Index” to select the appropriate field.

2.6 Function Keys

To be more convenient, there are a series of function keys for user to call the desired function directly. To press the function keys on the keyboard, the relative function will be executed by AccPower Retailing System.

F1 On any interfaces, press [F1] to call Online Help for current interface.

F2 Under Browse mode, press [F2] to add a new record.
Under Insert/Edit mode, press [F2] to save the record.

F6 On any transactions entry interface, user can input a new record to maintenance files without exiting the transaction entry interface. To do this,

just by pressing [F6] on the appropriate fields, such as customer code, currency or salesman, etc. The interface of relative maintenance files will be displayed. When finished, press [Exit] to close this interface and the current record will be copied to this transaction.

F8 On Printing dialog box, press [F8] to execute Report Designer to modify the report format.

F10 Under Browse mode of any transactions, press [F10] to call Printing dialog box.

F12 Send out reports via e-mail.

Ctrl-Del To input items, press [Ctrl] + [Del] to delete the record at cursor position.

Ctrl-E To change to English interface.

Ctrl-B To change to traditional Chinese interface.

Ctrl-S To change to simplified Chinese interface.

2.7 Send reports by e-mail

All reports in AccPower Retailing System can be sent out to the designated person via e-mail. To call this function, presses [F12] in Printing Dialog Box or right click the mouse in Printing Dialog Box to choose [Send Report by Mail]. The reports in JPG format will be created by AccPower Retailing System and attached in the e-mail. The speed of this process depends on the size of the reports. Progress bar will be displayed for reference.

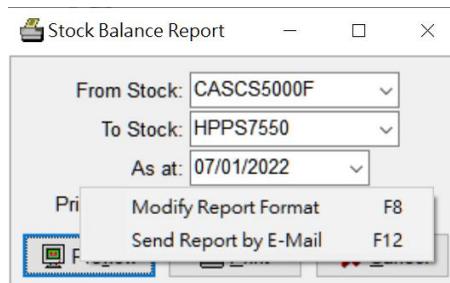

Figure 2-14 Printing Dialog Box

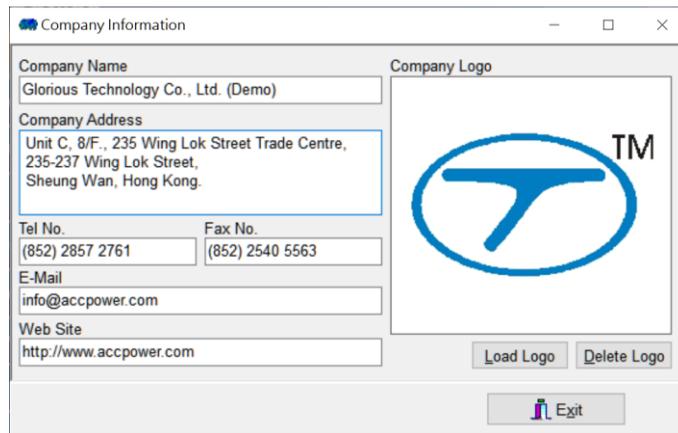

Chapter 3 General Files Management

There are many common files in AccPower Retailing System. In which, some files are very important. In this chapter, we will introduce some key points for these common files.

3.1 Company Information

The content of Company Information includes user's basic information: company name, address, telephone number, fax number and BR number, etc. All fields in this file are not necessary to fill in. However, company name will be showed at almost all reports. Thus, company name should be filled in.

It is easy to handle Company Information. It is only to fill the data in certain fields. AccPower Retailing System will confirm you to save the modification or not when you press [Exit]. Press [Yes] to save the records.

The screenshot shows a window titled "Company Information" with the following fields and content:

- Company Name:** Glorious Technology Co., Ltd. (Demo)
- Company Address:** Unit C, 8/F., 235 Wing Lok Street Trade Centre, 235-237 Wing Lok Street, Sheung Wan, Hong Kong.
- Tel No.:** (852) 2857 2761
- Fax No.:** (852) 2540 5563
- E-Mail:** info@accpower.com
- Web Site:** http://www.accpower.com
- Company Logo:** A blue logo consisting of a stylized 'T' inside an oval, with "TM" to its right.
- Buttons:** "Load Logo", "Delete Logo", and "Exit".

Figure 3-1 Company Information

3.2 Currency File

Currency File divides into two parts: Local currency and foreign currency. Local currency is the currency used by the user at his place and to be used in company's financial reports. The exchange rate is 1. You should input all information including code, exchange rate and description.

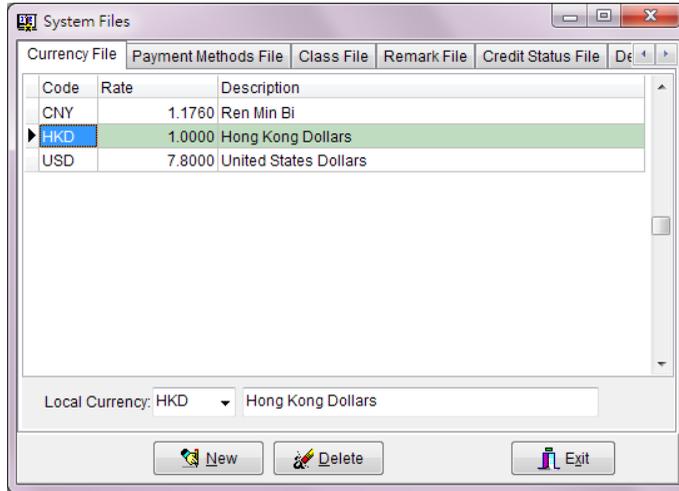

Figure 3-2 Currency File

- Code Currency's short name, up to 4 characters.

- Exchange Rate Exchange rate for local currency is 1. The exchange rate for foreign currency is one unit foreign currency equal to how much local currency. For example, if local currency is HK Dollar. One US Dollar can change for 7.8 HK Dollars. The exchange rate for US Dollar is 7.8.
 If you are first time to this file, please fill in all information and choose one currency as local currency. If the exchange rate of the chose currency is not equal to 1, AccPower Retailing System will automatically change the exchange rate of the chose currency to 1 and the exchange rate of other currencies will be adjusted to correct value.

- Description Detail description for this currency.

3.3 Transaction Numbers File

Transaction Numbers File records the initial number for every transaction. For example, if you want to set the next invoice number is I2011/00080; you can just input I2011/00080 in the relative field.

All transaction number will be incremental automatically.

Note: Each type of transaction number should be differentiated. The simple method is to add a character in front of number. For example, add 'I' in front of Invoice number and add 'DN' in front of Delivery Note number, etc.

Figure 3-3 Transaction Number Files

3.4 Tax File

AccPower Retailing System supports multi taxation for multi countries. Figure 3-4 is a sample of Value Added Tax of China.

Tax Code	Short name given by users.
Tax Rate	Tax Rate is defaulted as percentage. Thus, please just input the digit.
Description	Detail description for a tax.
Country	Select an appropriate country for sales tax used. Please choose Other Country if no sales tax used.
Before Discount	If the taxation is calculated based on invoice amount before discount, please mark '✓' in this field.
Accumulation	If there are more than one type of taxes on an invoice and the later one is calculated based on invoice amount plus precious tax, please mark '✓' in this field.
Default Tax 1 & 2	Default Tax 1 is relative to the Sales Tax 1 of sales transactions. Default Tax 2 is relative to the Sales Tax 2 of sales transactions.

Generally speaking, Default Tax 1 is regional tax and Default Tax 2 is country tax. In U.S.A, Default Tax 1 is state tax and Default Tax 2 is federal tax. Default Tax 1 and 2 should be blank if there is no sales tax.

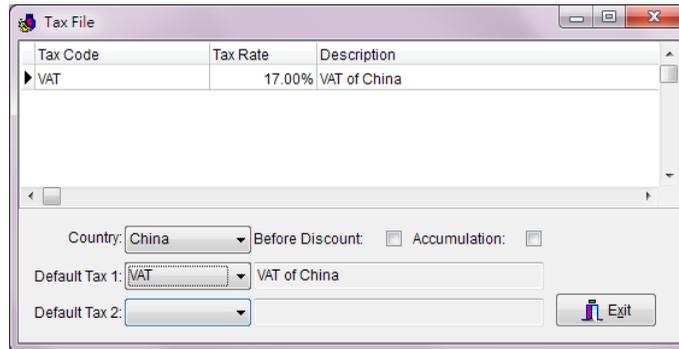

Figure 3-4 Tax File

3.5 Payment Methods File

The description of a payment method is up to 40 English or Chinese characters. If there are deposits in a sales invoice, the account code selected here will be used. Otherwise, Default bank account selected in Control Account File will be used.

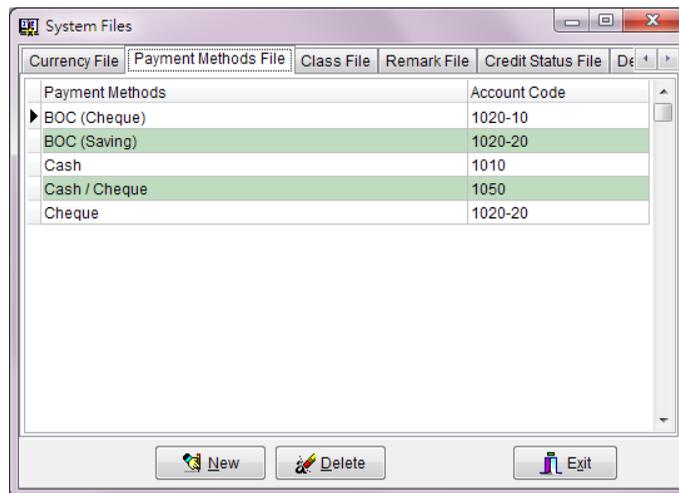

Figure 3-5 Payment Methods File

3.6 Class File

The name for a class is up to 40 English or Chinese characters.

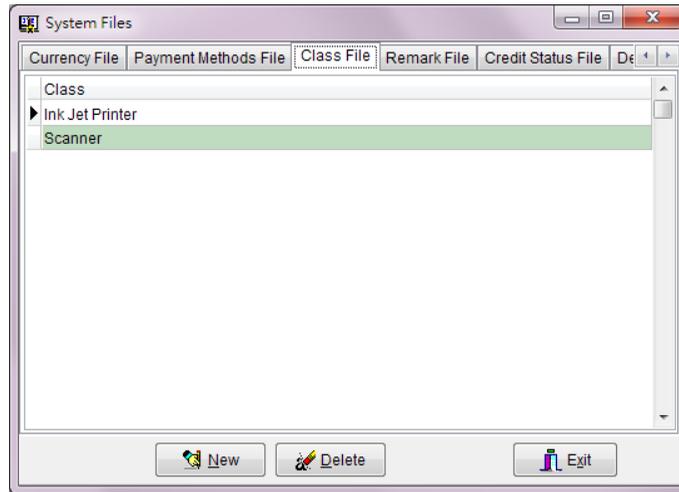

Figure 3-6 Class File

3.7 Vendor File

This file is to keep basic information for all vendors. It is familiar with Customer File.

3.7.1 Input Information

Contact Information

Code This field is max to 20 digits or characters. Under Insert mode, vendor code can be altered. After the vendor's record saved, this field cannot be altered.

To be better management, it should be added an appropriate character in front of digit. For example, if a company's short name is CA, vendor code should be CA001. The next one will be CA002.

Currency The currency, mostly used by this vendor. This currency will be automatically filled in all transactions.

Class It is to record the classification of vendors.

- Inactive Please mark ‘✓’ in this field if the vendor had been terminated. After that, no any invoices can be issued to this vendor. However, this vendor should not be deleted before Year End since this vendor may have linkage with other transactions, e.g. invoice.
- Name Vendor’s name with maximum 60 characters.

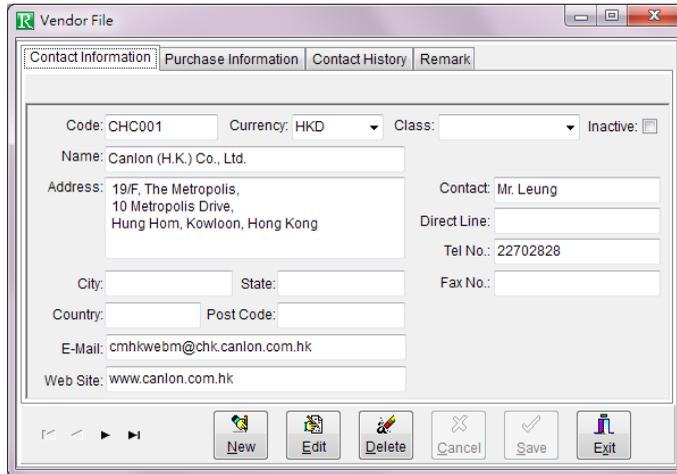

Figure 3-7 Vendor’s Contact information

- Address It is to record the address of a vendor. Press [Enter] to add a new line.
- City/State/Country/Post Code User can key in relevant information in these fields.
- Contact Key person in this company to be contacted.
- Direct Line Telephone number to contact key person directly.
- Tel. No. Telephone number of the company.
- Fax No. Fax number of the company.
- E-mail E-mail address for the company or contact person. For example, our company’s customer support E-mail address is: support@accpower.com.
- Web Site Vendor’s company web site. Our company’s web site is <http://www.accpower.com>.
- Purchase Information

- Payment Terms** To record the payment terms of a vendor. The due date will be automatically calculated when an invoice issued. Of course, the due date can be altered when an invoice issued.
- Payment is due** The date for calculating the payment date. It divides into three types: invoice date, 15th date of each month, and End date of each month. The date is the payment date for each invoice, matched with payment terms. For example, if the payment term is 15 days credit, the payment date will be invoice date plus 15 days based on invoice date, or the next fifteenth date plus 15 days based on 15th date of each month, or the date at month end plus 15 days based on End date of each month.
- Plus X days** It is used to calculate the due date of an invoice. The due date can be edited when an invoice issued.
- Purchase Discount** This figure will be automatically filled in the field of Total Discount 1 in a vendor invoice.
- A/P Account** User can set different A/P account to different vendor. Only the account with A/P category in Chart of Accounts will be displayed here.

The screenshot shows a 'Vendor File' window with a 'Purchase Information' tab selected. The vendor ID is CHC001 and the name is Canlon (H.K.) Co., Ltd. The 'Payment Terms' section shows 'Payment is due: End of Each Month' with a dropdown arrow, followed by 'plus 0 days' and 'Purchase Discount: 0.00%'. Below this, there are several rows of data: 'A/P Account: 2000', 'Credit Limit: 100,000.00', 'Payment Method: BOC (Cheque)', 'Opening Balance: 0.00', 'Delivery Methods: Local Delivery', 'Current Balance: 590,754.40', 'Staff: JP001', 'Bank Account No.:', 'Credit Status:', 'Tax ID No.:', and 'Taxable: '. At the bottom, there are navigation buttons: 'New', 'Edit', 'Delete', 'Cancel', 'Save', and 'Exit'.

Figure 3-8 Vendor's Purchase information

- Payment Method** The payment method is usually used by the vendor. It will automatically be filled in when an invoice issued and can be altered temporarily.

Delivery Method	Default delivery method of a vendor.
Staff	The responsible staff for this vendor and will be filled in Prepared By field by AccPower Retailing System automatically.
Credit Status	It is to classify the credit status of a vendor.
Credit Limit	It is the maximum credit limit for a vendor. When A/P is greater than credit limit, AccPower Retailing System will reject to issue an invoice or to give warning signal according to different authorize level.
Opening Balance	The opening balance for this financial year is automatically brought from previous financial year by AccPower Retailing System. If you are first time to use AccPower Retailing System, please refer to [Opening Balance Setup].
Current Balance	Amounts due from vendor including opening balance.
Bank A/C No	Vendor's main banker account number.
Tax ID No	Vendor's Tax ID No.
Taxable	If the sales tax is paid by the vendor, please mark '✓' in this field.

Contact History

This page is to record all contact information related to a vendor. AccPower Retailing System displays 14 days' contact information (7 days before or after the current day). The date range can be set by the user.

To view or edit the information, please use mouse to double click the field of content.

Remark

Remark	It is for user to input supplementary information for a vendor.
Billing Reminder	The information will be automatically filled in the remark field of a sales invoice.
Create Date	This field will be automatically filled in as current date. To alter, just by input directly or use the mouse to double click the button with triangle in this field to call a calendar for choosing the desired date.

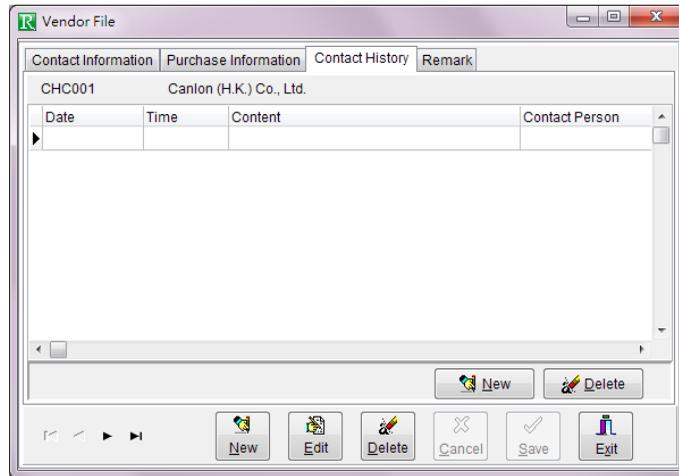

Figure 3-9 Vendors' Contact History

3.7.2 Opening Balance Setup

The opening balance is not just a number. It should include the content of an invoice: invoice number, invoice date, invoice amount and paid amount. The user should key in all unpaid invoices. Of course, you can group all unpaid invoices into one. For example, if there are ten unpaid invoices totally amounted \$2,800. It can be represented for one invoice: BAL980001 amounted \$2,800. Under Insert or Edit mode, press [Insert] button of the keyboard or double click this field by mouse to call the screen of Figure 3-21.

Invoice Number It contains 20 digits or characters. It must be unique.

Invoice No.	Date	Due Date	Cur.	Rate	Salesman	Invoice Amount	Paid	Balance
V11003689	1/3/2010	1/4/2010	HKD	1.0000	JP001	1,200.00	300.00	900.00
V11003780	10/3/2010	10/4/2010	HKD	1.0000	JP001	2,100.00	500.00	1,600.00

Figure 3-10 Opening Balance Setup

Invoice Date Invoice date is the date to issue an invoice.

Due Date	It is the payment date for an invoice.
Currency	The currency used in the invoice.
Rate	It is the exchange rate between the selected currency and local currency. To change it just by input the new rate directly. To change the exchange rate permanently, please go to Currency File.
Salesman	The salesman is responsible for this invoice. User can select the desired one just by pressing the downward arrow.
Invoice Amount	Total invoice amount exclusive discount amount.
Paid	The amount has been paid.
Balance	Total invoice amount minus paid amount. AccPower Retailing System automatically calculates it.

3.8 Stock File

The file is to keep the information for stocks. User can also add a non-stock item stock in stock file. It should be classified as Service type. AccPower Retailing System will not count the quantity of this stock.

The interface for Stock File divides into Basic Information, Sales Information, Purchase Information, Remark and Image.

3.8.1 Basic Information

Stock Code	This field is up to 30 digits or characters. Under Insert mode, stock code can be altered. After the stock information saved, this field cannot be altered. To be better management, stock code should be easy to memory. Bar code should not be used as stock code.
Bar Code	The content of bar code, e.g. 4899628434108.
Service Item	If the stock is non-stock item, please mark '✓'.
Inactive	Please mark '✓' in this field if one stock had been stopped to sell. However, this record should not be deleted before Year End since this record may have linkage with other transactions, e.g. sales invoices or vendor invoices.

Name The name for a stock with maximum 60 English or Chinese characters.

Stock Type To work with General Ledger, the types of a stock is very important. Different accounts will be debited / credited when different stock type selected, please refer to Section 3.6 [Control Accounts]. The inventory of a stock with Service type will not be counted.

Figure 3-11 Stock File (Basic Information)

Unit of Measure It is for the measurement of a stock. It can be selected from the existing records or input a new one directly. This field is up to 8 characters or 4 Chinese characters.

Color Stock's color.

Packing Stock's packing e.g. 32X45X88 etc.

Gross Weight Stock's weight including package.

Net Weight Stock's net weight.

Class Classification of a stock.

Size Stock's size.

Reorder Level Qty

The minimum quantity should be kept for a stock. When the quantity is lower than Reorder Level Qty, there is a warning message showed.

Since it takes time to purchase stocks from vendor and sell stocks in between, you should keep a certain level quantity of a stock. Otherwise, it may be out of stock if too little stock kept or waste warehouse and money if too much stock kept.

- Sales Order Qty The outstanding quantities ordered by the customers.
- P/O Qty The outstanding quantities ordered from the vendors.
- Opening Stock It is bought from last year or the quantities input when you are first time to AccPower Retailing System.
- Stock On Hand Current stock quantities. This field is automatically calculated by AccPower Retailing System.

3.8.2 Sales Information

Selling Price Selling Price divides into Standard Price, Retail Price, Wholesale Price, Promotion Price, Maximum Price and Minimum Price. Warning message will be showed when the actual selling price is out of the range of maximum price and minimum price.

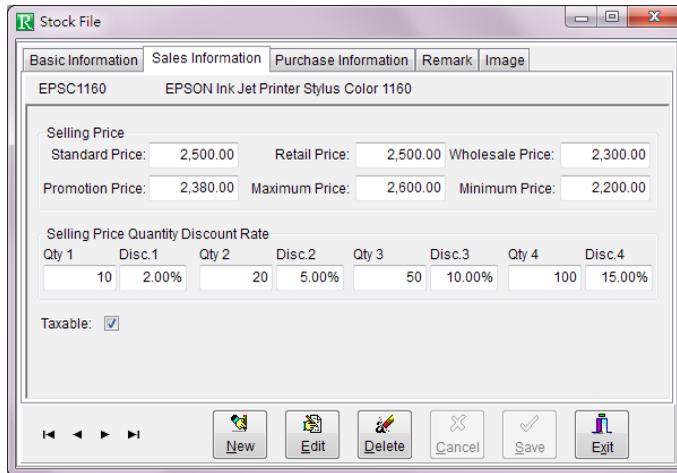

Figure 3-12 Stock File (Sales Information)

Selling Price Quantity Discount Rate

AccPower Retailing System supports up to 4 levels accumulated discounts for each stock. For example, 2% off for over 10 pieces, 5% off for over 20 pieces, 10% off for over 50 pieces, 15% off for over 100 pieces

Note: If this quantity discount rate has been input in the Stock File, last selling price will not be displayed when an invoice issued.

Taxable If there is a sales tax on a stock, please mark '✓'.

3.8.3 Purchase Information

Last Purchase Price

The latest purchase price for a stock is automatically updated by AccPower Retailing System.

Average Cost Price

Average cost price is calculated based on actual purchase price. When a vendor invoice issued, this field will be automatically filled in. If you are first time to AccPower Retailing System, this field should be key in by yourself. Otherwise, the result of average cost will be wrong.

Standard Cost Price It is set and updated by the user.

Taxable If there is a sales tax on a stock, please mark '✓'.

Vendor Stock Code It is for user to input vendor's stock code. If it is different from yours, you can input the vendor stock code in this field. You can also change P/O format by yourself to display vendor's stock code.

The screenshot shows a software window titled "Stock File" with a tabbed interface. The active tab is "Purchase Information". The window displays the following data for item "EPSC1160 EPSON Ink Jet Printer Stylus Color 1160":

Field	Value
Last Purchase Price:	2,010.00
Average Cost Price:	2,050.00
Standard Cost Price:	2,050.00
Taxable:	<input checked="" type="checkbox"/>
Vendor Stock Code:	

At the bottom of the window, there is a toolbar with the following buttons: New, Edit, Delete, Cancel, Save, and Exit.

Figure 3-13 Stock File (Purchase Information)

3.8.4 Remark

It is to record the supplementary information for a stock.

3.8.5 Image

User can save the image of a stock here. AccPower Retailing System supports 6 image formats, i.e. JPG, JPEG, BMP, ICO, EMF, and WMF. When you use Report Designer to design the format of a report, please specify the designated image format. One type of image format for all stocks is recommended.

Create Date This field will be automatically filled in as current date. To alter, just by input directly or use the mouse to double click the button with triangle in this field to call a calendar for choosing a desired date.

3.9 Employee File

Employee Code This field can contain 20 characters. Under Insert mode, employee code can be altered. After the record saved, this field cannot be altered.

To be better management, it should be added an appropriate character in front of the digit.

Inactive If this record is not to be used, please mark '✓'.

The screenshot shows a window titled "Employee File" with the following fields and controls:

- Employee Code: GM001
- Inactive:
- English Name: Gilbert Mok
- Chinese Name: [Empty]
- Address: [Empty]
- Sex: Male (dropdown)
- I.D. No.: [Empty]

Modified Date AccPower will automatically update the latest modified time of this record.

Modified By AccPower will automatically update the latest modified user name of this record.

Chapter 6 Purchase Order Entry

The interface divides into two pages: Main and Remark.

6.1 Main

Main page includes three parts: header, detail and footer.

6.1.1 Header

Header includes major contents of a Purchase Order. Most of the contents can be selected from the existing files. If no suitable record can be selected or to input a new record, user can call the interface of the files under Maintenance to add a new record by pressing [F6] on the appropriate fields, such as Vendor Code, Currency or Prepared By, etc. To close the interface just by pressing [Exit] and the current record will be copied to this Purchase Order.

P. O. No. Purchase Order number contains 20 digits or characters and is automatically incremental.

Note: Purchase Order Number should be unique to other Transaction Number. To change P. O. No. for next purchase order, you should go to Transaction Numbers File in File Maintenance.

Date This field is the date to issue a purchase order and will be automatically filled in as current date. To alter, just by input directly or use the mouse to double click the button with triangle in this field to call a calendar for choosing a desired date. The format is according to the date format of MS Windows. To change the format, please go to Control panel of MS Windows.

Vendor Code Press the button beside the field by the mouse to call the dialog box for searching via vendor code, vendor name or telephone number.

Currency The currency will be filled as vender's default currency. It can be altered.

Rate It is the exchange rate between the selected currency and local currency. AccPower Retailing System will exchange the foreign currency to local currency based on this exchange rate.

Job Code The job code assigned to this transaction. It can be blank.

- Prepared By It is to record the employee who is responsible to this purchase order.
- Payment Terms It is the credit days from the vendor. Please refer to Vender File.
- Payment Method It is to record vender's payment method.
- Delivery Methods It is to record the delivery method for this purchase order.

6.1.2 Detail

The items can be stock items or remarks input by the user. It includes eight fields: Item, Stock Code, Stock Name/Description, Quantity, Unit, Unit Price, Discount, and Amount.

- Item It is to input the number for each item or other information.
- Stock Code User can input the code directly or press the button beside the field to select the existing records.

Stock Name/Description

Stock name is automatically filled in when Stock Code has been selected. User can modify stock name directly. However, the modified stock name is just for this record. For the item not existing in Stock File, user can input the name in here.

- Quantity The quantities are ordered from the vendor.
- Unit It can be selected from the existing records or input directly.
- Unit Price The purchase price for the stock.
- Discount This discount is defaulted as percentage. Thus, please just input the digit.
- Amount This amount is automatically calculated by AccPower Retailing System. User cannot alter. It equals to Quantity times Unit Price minus Discount.

Insert and Delete an Item

To insert a record at cursor position, press [Insert] button on the keyboard. Press [Ctrl-Del] to delete the record at cursor position.

Figure 6-1 Purchase Order entry

6.1.3 Footer

Footer includes Tax 1 & 2, Total Discount 1 & 2, Freight Charges, Other Charges and Balance.

Tax 1 & 2 Sales tax is automatically calculated by AccPower Retailing System based on default formula set by user. Please refer to Tax File.

Total Disc 1 This discount is calculated based on total amount. User can just input the percentage or discount amount in relative field. These two fields are co-related. When the percentage input, discount amount will be automatically calculated. Vice Versa.

Total Disc 2 This discount is calculated based on total amount exclusive total discount 1.

Freight Charges The freight charges are paid to the vendor.

Other Charges All other charges are paid to the vendor.

Balance It is automatically calculated. It equals to total amount plus freight charges and other charges minus total discount 1 & 2.

6.2 Remark

Remark	User can input detail description for each purchase order.
Delivery Date	The date to deliver the goods. To input directly or use the mouse to double click the button with triangle in this field to call a calendar for choosing a desired date.
Ref No	It is for the user to input supplementary information.
Customer Order No	It is the order no. for the customer.
Vendor Quotation No	It is the quotation no. from the vendor.
P. O. No.	It is customer's purchase order number.

6.3 Other Functions

Print	Under Browse mode, press the right key of the mouse to call functions menu. The first function is to print purchase order. User can also press [F10] to call dialog box for printing or preview.
Modify Format	Press [F8] or right key of the mouse on Print dialog box to call Report Designer. User should select the desired format before Report Designer executed.
Search	To search a designated purchase order, press the button beside the field of P.O. No., or press the right key of the mouse to call functions menu for searching.
Copy	User can copy the content of the existing transactions to a new purchase order by pressing right key of the mouse to call functions menu for copying.
Unit Price Decimal	User can set decimal point, maximum to 4 point, for unit price in Preference File.

Chapter 7 Vendor Invoice Entry

The interface divides into three pages: Main and Remark.

7.1 Main

Main page includes three parts: header, detail and footer.

7.1.1 Header

Header includes major contents of a Vendor Invoice. Most of the contents can be selected from the existing files. If no suitable record can be selected or to input a new record, user can call the interface of the files under Maintenance s to add a new record by pressing [F6] on the appropriate fields, such as Vender Code, Currency or Prepared By, etc. To close the interface just by pressing [Exit] and the current record will be copied to this Vendor Invoice.

Invoice No. Invoice number contains 20 digits or characters and is automatically incremental.

Note: Invoice Number should be unique to other Transaction Number. To change the Invoice No. for next invoice, you should go to Transaction Numbers File in File Maintenance.

Date This field is the date to issue an invoice and will be automatically filled in as current date. To alter, just by input directly or use the mouse to double click the button with triangle in this field to call a calendar for choosing a desired date. The format is according to the date format of MS Windows. To change the format, please go to Control panel of MS Windows.

Vendor Code Press the button beside the field by the mouse to call the dialog box for searching via vendor code, vendor name or telephone number.

Currency The currency will be filled as vendor's default currency. It can be altered.

Rate It is the exchange rate between the selected currency and local currency. AccPower Retailing System will exchange the foreign currency to local currency based on this exchange rate.

Job Code The job code assigned to this transaction. It can be blank.

Prepared By	It is to record the employee who is responsible to this vendor invoice.
Payment Terms	It is the credit days granted from the vendor. Please refer to Vendor File.
Due Date	The date of account payable will be due. It is automatically calculated by AccPower Retailing System based on payment terms. It can be altered by the user.
Payment Method	It is to record vendor's payment method. If there is an account code selected for this payment method in Payment Method File, this payment will be credited to this account.
Delivery Methods	It is to record the delivery method for this invoice.

7.1.2 Detail

The items can be stock items or remarks input by the user. It includes eight fields: Item, Stock Code, Stock Name/Description, Quantity, Unit, Unit Price, Discount, and Amount.

Item	It is to input the number for each item or other information.
Stock Code	User can input the code directly or press the button beside the field to select the existing records.
Stock Name/Description	Stock name is automatically filled in when Stock Code has been selected. User can modify stock name directly. However, the modified stock name is just for this record. For the item not existing in Stock File, user can input the name in here.
Quantity	The quantities are bought from the vendor.
Unit	It can be selected from the existing records or input directly.
Unit Price	The purchase price for the stock.
Discount	This discount is defaulted as percentage. Thus, please just input the digit.
Amount	This amount is automatically calculated by AccPower Retailing System. User cannot alter. It equals to Quantity times Unit Price minus Discount.

Insert and Delete an Item

To insert a record at cursor position, press [Insert] button on the keyboard. Press [Ctrl-Del] to delete the record at cursor position.

Item	Stock Code	Stock Name/Description	Quantity	Unit	Unit Price	Disc	Amount
1	CASC5000F	Canon Scanner CanScan 5000F	15	Pcs	208.00	0.00%	3,120.00
2	CASC9900F	Canon Scanner CanoScan 9900F	15	Pcs	256.00	0.00%	3,840.00
3	CASCSD1250U2	Canon Scanner CanoScan D1250U2	15	Pcs	128.00	0.00%	1,920.00

Tax 1:	0.00%	0.00	Total Dis. 1:	0.00%	0.00	Freight Charges:	0.00	Deposit:	0.00
Tax 2:	0.00%	0.00	Total Dis. 2:	0.00%	0.00	Others Charges:	0.00	Balance:	8,880.00

Figure 7-1 Vendor Invoice Entry

7.1.3 Footer

Footer includes Tax 1 & 2, Total Discount 1 & 2, Freight Charges, Other Charges, Deposits and Balance.

Tax 1 & 2 Sales tax is automatically calculated by AccPower Retailing System based on default formula set by user. Please refer to Tax File.

Total Disc 1 This discount is calculated based on total amount. User can just input the percentage or discount amount in relative field. These two fields are co-related. When the percentage input, discount amount will be automatically calculated. Vice Versa.

Total Disc 2 This discount is calculated based on total amount exclusive total discount 1.

Freight Charges The freight charges paid to the vendor.

Other Charges All other charges paid to the vendor.

Deposit To record the amount paid to the vendor.

Balance It is automatically calculated. It equals to total amount plus freight charges and other charges minus total discount 1 & 2 and deposits. It will be posted this vendor's account payable.

7.2 Remark

Remark User can input detail description for each vendor invoice.

Delivery Date The date to deliver the goods. To input directly or use the mouse to double click the button with triangle in this field to call a calendar for choosing a desired date.

Ref No It is for the user to input supplementary information.

Customer Order No It is the order no. for this customer.

Vendor Quotation No It is the quotation no. from the vendor.

7.3 Other Functions

Print Under Browse mode, press the right key of the mouse to call functions menu. The first function is to print vendor invoice. User can also press [F10] to call dialog box for printing or preview.

Modify Format Press [F8] or right key of the mouse on Print dialog box to call Report Designer. User should select the desired format before Report Designer executed.

Search To search a designated vendor invoice, press the button beside the field of Invoice No., or press the right key of the mouse to call functions menu for searching.

Copy User can copy the content of the existing transactions to a new vendor invoice by pressing right key of the mouse to call functions menu for copying.

Unit Price Decimal User can set decimal point, maximum to 4 point, for unit price in Preference File.

Chapter 8 Purchase Return Entry

The interface divides into three pages: Main and Remark.

8.1 Main

Main page includes three parts: header, detail and footer.

8.1.1 Header

Header includes major contents of a Purchase Return. Most of the contents can be selected from the existing files. If no suitable record can be selected or to input a new record, user can call the interface of the files under Maintenance s to add a new record by pressing [F6] on the appropriate fields, such as Vender Code, Currency or Prepared By, etc. To close the interface just by pressing [Exit] and the current record will be copied to this Purchase Return.

Invoice No. Invoice number contains 20 digits or characters and is automatically incremental.

Note: Invoice Number should be unique to other Transaction Number. To change the Invoice No. for next invoice, you should go to Transaction Numbers File in File Maintenance.

Date This field is the date to issue an invoice and will be automatically filled in as current date. To alter, just by input directly or use the mouse to double click the button with triangle in this field to call a calendar for choosing a desired date. The format is according to the date format of MS Windows. To change the format, please go to Control panel of MS Windows.

Vendor Code Press the button beside the field by the mouse to call the dialog box for searching via vendor code, vendor name or telephone number.

Currency The currency will be filled as vendor's default currency. It can be altered.

Rate It is the exchange rate between the selected currency and local currency. AccPower Retailing System will exchange the foreign currency to local currency based on this exchange rate.

Job Code The job code assigned to this transaction. It can be blank.

- Prepared By It is to record the employee who is responsible to this purchase return.
- Payment Terms It is the credit days granted from the vendor. Please refer to Vendor File.
- Due Date The date of account payable will be due. It is automatically calculated by AccPower Retailing System based on payment terms. It can be altered by the user.
- Payment Method It is to record vendor's payment method. If there is an account code selected for this payment method in Payment Method File, this payment will be credited to this account.
- Delivery Methods It is to record the delivery method for this purchase return.

8.1.2 Detail

The items can be stock items or remarks input by the user. It includes eight fields: Item, Stock Code, Stock Name/Description, Quantity, Unit, Unit Price, Discount, and Amount.

- Item It is to input the number for each item or other information.
- Stock Code User can input the code directly or press the button beside the field to select the existing records.
- Stock Name/Description Stock name is automatically filled in when Stock Code has been selected. User can modify stock name directly. However, the modified stock name is just for this record. For the item not existing in Stock File, user can input the name in here.
- Quantity The quantities returned to the vendor.
- Unit It can be selected from the existing records or input directly.
- Unit Price The purchase price for the stock.
- Discount This discount is defaulted as percentage. Thus, please just input the digit.

Amount This amount is automatically calculated by AccPower Retailing System. User cannot alter. It equals to Quantity times Unit Price minus Discount.

Insert and Delete an Item

To insert a record at cursor position, press [Insert] button on the keyboard. Press [Ctrl-Del] to delete the record at cursor position.

Figure 8-1 Purchase Return Entry

8.1.3 Footer

Footer includes Tax 1 & 2, Total Discount 1 & 2, Freight Charges, Other Charges, Deposits and Balance.

Tax 1 & 2 Sales tax is automatically calculated by AccPower Retailing System based on default formula set by user. Please refer to Tax File.

Total Disc 1 This discount is calculated based on total amount. User can just input the percentage or discount amount in relative field. These two fields are co-related. When the percentage input, discount amount will be automatically calculated. Vice Versa.

Total Disc 2 This discount is calculated based on total amount exclusive total discount 1.

Freight Charges The freight charges paid to the vendor.

Other Charges	All other charges paid to the vendor.
Deposit	To record the amount paid to the vendor.
Balance	It is automatically calculated. It equals to total amount plus freight charges and other charges minus total discount 1 & 2 and deposits. It will be posted this vendor's account payable.

8.2 Remark

Remark	User can input detail description for each purchase return.
Delivery Date	The date to deliver the goods. To input directly or use the mouse to double click the button with triangle in this field to call a calendar for choosing a desired date.
Ref No	It is for the user to input supplementary information.
Customer Order No	It is the order no. for the customer.
Vendor Quotation No	It is the quotation no. from the vendor.

8.3 Other Functions

Print	Under Browse mode, press the right key of the mouse to call functions menu. The first function is to print purchase return. User can also press [F10] to call dialog box for printing or preview.
Modify Format	Press [F8] or right key of the mouse on Print dialog box to call Report Designer. User should select the desired format before Report Designer executed.
Search	To search a designated purchase return, press the button beside the field of Invoice No., or press the right key of the mouse to call functions menu for searching.
Copy	User can copy the content of the existing transactions to a new purchase return by pressing right key of the mouse to call functions menu for copying.
Unit Price Decimal	User can set decimal point, maximum to 4 point, for unit price in Preference File.

Chapter 9 Account Payable Payment Entry

Account Receivable Payment Entry is designed to settle the payment of a vendor invoice. It doesn't involve accounting knowledge. The interface is friendly and simple.

The interface divides into two parts: voucher header and contents.

9.1 Voucher Header

- Journal No** Journal number is max to 20 characters. It must be unique.
- Date** It is to record the date of transaction and will be automatically filled in as current date. To alter, just by input directly or use the mouse to double click the button with triangle in this field to call a calendar for choosing a desired date.
- Currency** Default currency is local currency. If the currency changed, the exchange rate will be changed respectively.
- Rate** It is the exchange rate between the selected currency and local currency. To change it just by input the new rate directly. To change the exchange rate permanently, please go to Currency File.
- Ref No** It is for the user to input supplementary information. It is up to 20 digits or characters.
- Vendor Code** Use the mouse to press this field to call search dialog box for searching records via Vendor Code.

Invoice No	Cur	Rate	Invoice Amt	Paid	Payment	Exch. Diff.	Payment
VP00023	HKD	1.0000	108,885.00	0.00	20,000.00	0.00	20,000.00

Figure 9-1 Account Payable Payment Entry

Vendor Name	The vendor's name matched with the vendor code will be displayed.
Remark	This field is for user to fill in detail description, up to 60 characters, related to this transaction.
Cheque No	It is for user to key in the cheque no. of this payment.
Payment Method	It is to record the payment method for this payment. If there is an account code selected for this payment method in Payment Method File, this payment will be debited to this account.
Total Payment	Total payment is calculated based on the currency of this voucher selected. User can key in the total payment amount, AccPower Retailing System will settle the invoices of this vendor by order. Or user can select the invoices to settle. AccPower Retailing System will calculate the total payment amount.
Exchange Difference	It is the total exchange difference for all invoices.
Remark 1/2	Detail description for each transaction with maximum 60 characters.

9.2 Contents

Invoice No.	All unpaid invoices for selected vendor will be displayed in here. Please choose one to make payment.
Currency	It is the currency of a selected invoice and cannot be altered.
Rate	It is the exchange rate of a selected invoice and cannot be altered.
Invoice Amount	This amount is total amount of an invoice.
Paid	All paid amounts include deposits based on invoice currency.
Payment	The amount for this payment based on invoice currency.
Exch. Difference	It is the exchange difference between the payment amount and the invoice amount.
Payment	The amount for this payment based on voucher currency.

Note: The currency should be same as voucher currency. For example, if voucher currency is Hong Kong Dollar, the amount filled in this field should be the amount of Hong Kong Dollar.

Chapter 10 Stock Adjustment Entry

Stock Adjustment Entry is to adjust the quantity of individual stock in warehouse.

10.1 Main

Main page includes three parts: header, detail and footer.

10.1.1 Header

Bill No. Bill No. contains 20 digits or characters and is automatically incremental.

Note: Bill No. should be unique to other Transaction Number. To change the Bill No. for next stock adjustment, you should go to Transaction Numbers File in File Maintenance.

Date This field is the date to entry stock adjustment and will be automatically filled in as current date. To alter, just by input directly or use the mouse to double click the button with triangle in this field to call a calendar for choosing a desired date. The format is according to the date format of MS Windows. To change the format, please go to Control panel of MS Windows.

Description It is to record the reason of the stock adjustment.

Item	Stock Code	Stock Name	Quantity	Unit	Unit Price	Amount
1	CASCSD646U	Canon Scanner CanoScan D646U ex	2	Pcs	0.00	0.00
2	EPSC1160	EPSON Ink Jet Printer Stylus Color 1160	(1)	Pcs	0.00	0.00

Figure 10-1 Stock Adjustment Entry

Currency The currency will be filled as local currency. It can be altered.

Rate	It is the exchange rate between the selected currency and local currency. AccPower Retailing System will exchange the foreign currency to local currency based on this exchange rate.
Job Code	The job code assigned to this transaction. It can be blank.
Prepared By	It is to record the employee who is responsible to this stock adjustment.
Ref No	It is for user to input supplementary information.

10.1.2 Detail

The items must be stock items. It includes seven fields: Item, Stock Code, Stock Name/Description, Quantity, Unit, Unit Price and Amount.

Item	It is to input the number for each item or other information.
Stock Code	User can input the code directly or press the button beside the field to select the existing records.
Stock Name/Description	Stock name is automatically filled in when Stock Code has been selected. User can modify stock name directly. However, the modified stock name is just for this record. For the item not existing in Stock File, user can input the name in here.
Quantity	The quantities of a stock will be adjusted. Please use positive sign to increase the inventory and negative sign to decrease the inventory.
Unit	It can be selected from the existing records or input directly.
Unit Price	The unit price for the stock.
Amount	This amount is automatically calculated by AccPower Retailing System. User cannot alter. It equals to Quantity times Unit Price.

Insert and Delete an Item

To insert a record at cursor position, press [Insert] button on the keyboard. Press [Ctrl-Del] to delete the record at cursor position.

10.1.3 Footer

Total Quantity It is the total quantities of all items.

Total Amount This amount is automatically calculated by AccPower Retailing System. It is the total amount of all items.

10.2 Remark

User can input detail description for each stock adjustment.

Chapter 11 System Tools

11.1 Backup Data

After this function has been chosen, Figure 17-1 will be displayed. User should choose target drive and sub directory and press [Start] button to start. If there is a lot of data to backup, more than one diskette will be requested. Please put the diskettes with backup data at safe place with right label. To avoid backup the error data, please use system tools to check database before backup.

Start Press [Start] to start. Before backup data, the disk should be formatted. All files in the diskette will be overwritten.

Exit To exit Backup Screen.

To use this function, please note:

1. Only the drive and the directory supported by your MS Windows can be chosen. If you can not choose the desired drive or directory, please check the settings of MS Windows.
2. If target drive is hard disk, please select one hard disk other than the exiting one. Otherwise, if there is any damage on the existing hard disk, the data and the backup data will be lost simultaneously.
3. The filename of the backup data will be aps4bak plus the company's short name and the current date and uses zip as file name extension. For an example, if the company's short name is ABC2022 and the date is 2022/01/30, then the file name will be aps4bak_abc2022_20220130.zip.

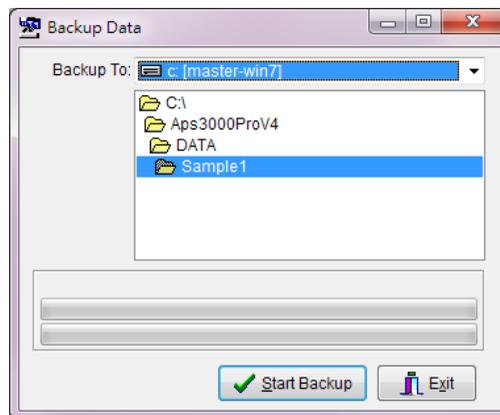

Figure 11-1 Backup Data

Note: Before backup data, AccPower Retailing System will automatically check whether there is another user executed the program. This function will be executed only without any one executed the program simultaneously. Moreover, it is better to backup more than one copy.

11.2 Restore Data

This function is used to restore the backup data to hard disk. Please point out the backup file of the source directory to be restored. And then, press [Start Restore] button to start. If backup diskettes are more than one, please insert the diskettes by order.

The Application will automatically check whether anyone executed the Application (including other modules) before Restore Data function is executed. Otherwise, the function will not be executed.

Note: This function will overwrite the data in target directory. Please be careful. If Restore procedure is stopped by force, the data in hard disk may be damaged.

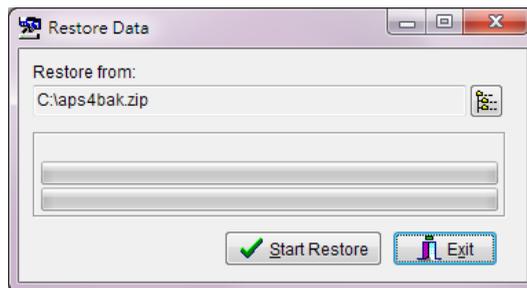

Figure 11-2 Restore Data

11.3 Transaction Audit

When there is the difference from the actual value due to hardware problem. Transaction Auditor can be executed to recalculate the balance of different transactions.

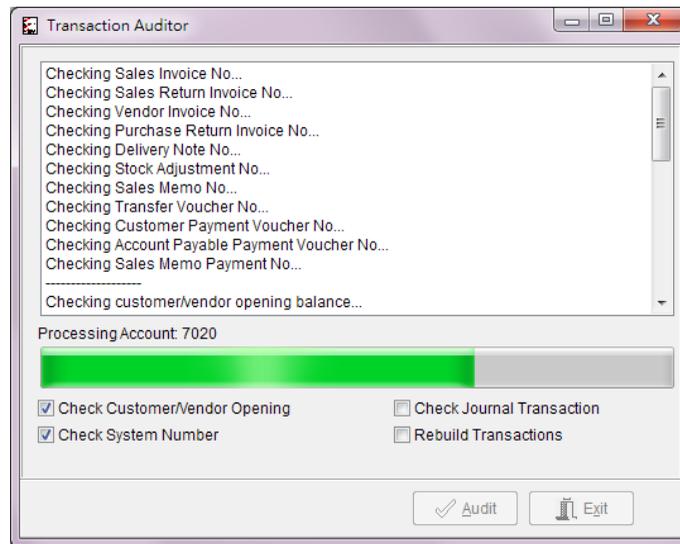

Figure 11-3 Transaction Auditor

11.4 Year End

Year End allows users to carry forward each year's data. The system will bring forward the balance of balance sheet's accounts to new financial year.

Year End function will guide user to create new account to deal with data after year end without deleting data of this financial year.

Steps:

1. Confirm Year End Date first.
2. Enter the company short name for the new financial year, for example, [ABC2022].
3. Confirm the new accounting period.
4. The system will automatically carry out the required processes and give notice when it is done.

Note: Please make sure you have at least one copy of data before run Year End function.

If there are any adjustments for previous year after Year End executed, you can adjust the transactions directly in old company data (e.g. CO2021). For the new company data, you can just input the correct opening balance to the relative accounts. If the adjustment involved A/R and A/P accounts, please adjust the opening balance for the relevant customers and vendors other than just adjust the opening balance for A/R account and A/P account.

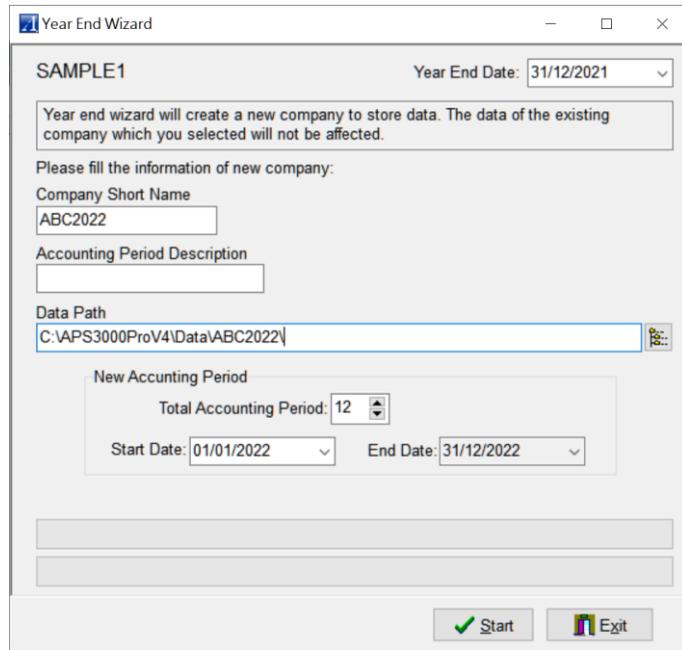

Figure 11-4 Year End

11.5 Database Tools

There are three functions: Check and Repair Data Files, Delete Transactions Data and Clear All Data.

11.5.1 Check and Repair Data Files

Database may be damaged caused by hardware problem or electric stopped, etc. To overcome, AccPower Retailing System has two built-in functions: Check and Repair Data Files.

- | | |
|--------|---|
| Verify | To check all database files. The result will be displayed in dialog box. If there are errors in database files, please execute Repair function to correct the errors in database files. |
| Repair | AccPower Retailing System will check all database files before repair the database files. Only database files with error will be repaired. The result will be displayed in dialog box. |

Save Result You can save the result of the database files verified or repaired as text file. The default name is result.txt.

Exit To exit and go to main menu.

11.5.2 Delete Transactions Data

This function is executed to delete all transaction files, including Sales Invoice, Vendor Invoice, A/R or A/P Payments and Stock Adjustment, etc. However, all files under File Maintenance will be reserved.

11.5.3 Clear all data

This function is executed to clear all data, including invoices, payments, stock adjustment and all files under File Maintenance. When this function finished, the database will be empty.

11.6 Import Data from other format files

This function allows the data in other formats can be imported into AccPower's database. Supported formats include Paradox File, dBase File, Text File, HTML File, MS Excel File, MS Word File, Lotus 1-2-3 File, QuattroPro File, XML File, MS Access Database File and ADO File. The data can be imported including Chart of Accounts, Customer File, Vendor File, Stock File, Employee File, Currency File, Payment Methods File, Class File, Credit Status File, District File, Unit of Measure File, Job File and Tax File.

Notes:

1. If the data is read from MS Access and ADO, MS Access and ADO database engine or compiler must be installed firstly.
No database engine or compiler must be installed if the data read from other formats, such as MS Excel.

2. User should have certain knowledge of database structure and source database formats.

Steps to import data:

1. Select target file, such as Customer File, and source file. Press [Start Import] to start.
2. Select file format of the data you want to import and press [Next]. User can also press [Specifications] to use the previous imported files' setting.
3. The System will show the directory and file name for confirmation.
4. Then, user should choose the correct settings, such as Text Settings, Data Formats,

which are related to the selected source file. If OK, press [Next] to preview.

5. Select field mappings to specify the correspondence between fields in the source and destination files.

6. The result of field mappings will be showed here. To filter the data of source file, please select [Load when] or [Skip if] and set the appropriate criterias. [Expression Builder] can be called for helping to set the appropriate criterias by pressing the button beside.

7. Select the appropriate Import Mode and press [Execute] to begin the import process. Press [Specifications] to save all settings of this import.

The figures of imported records will be showed after the import process finished.

11.7 Export Data to Other Formats

AccPower Retailing System has a powerful function, Export Data to Other Formats, for user to export the data to many general formats, such as Text File, HTML File, MS Excel File, MS Word File, Symbolic Link File, DIF File, Lotus 1-2-3 File, QuattroPro File, SQL File, XML File, MS Access Database File, Rich Text File, SPSS File, PDF File and LDAP File. By doing that, the data in AccPower Retailing System can be read by other applications.

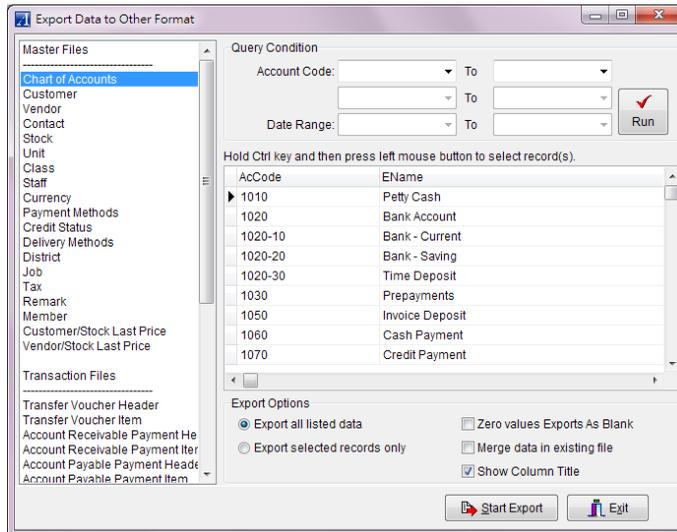

Figure 11-5 Export Data to Other Formats

11.7.1 File Name

The files, including Master Files and Transaction Files, are displayed on the left hand side of the window. Please select one of these files by using mouse to export. All detail contents of the selected file will be displayed on the right hand side of the window, Content Area. AccPower Retailing System allows the user to export designated records. Please refer to [Query Condition].

11.7.2 Query Condition

After the file has been selected, the criteria for selecting the records to be exported will be displayed. The criteria can be customer code, stock code, date range or transaction numbers, etc. Please choose the appropriate range and press [Run]. The result will be showed in Content Area.

11.7.3 Export Options

There are five options for selection.

Export all listed data	All records showed in Content Area will be exported. To select designated records to be exported, please refer to [Query Condition].
Export selected records only	User can select designated records in Content Area by pressing [Ctrl] button and using mouse to select the desired records simultaneously.
Export zero value as blank	If this field be selected, the zero value of the records will be interpreted as blank when the records are exported.
Merge data to existing file	If this field be selected and there is a same file name existed, the new records will be merged into the existing file. Otherwise, the existing file will only contain the new records.
Show Column Title	Please mark '✓' here if you want to show column titles in the first line of the records.

11.7.4 Start Export

The export function will be executed once you press [Start Export]. During the process, there are a series of questions will be displayed. Please answer the questions according to your options.

Chapter 12 Appendix

12.1 How to enhance the performance of AccPower's performance?

The speed of CPU and the size of RAM is the most important factors to affect the AccPower's performance. Normally, the faster speed of CPU, the higher AccPower's performance. However, data communication is very frequent when AccPower Retailing System executed. Therefore, the performance of HDD is more important than the speed of CPU. At least 64MB RAM is required for AccPower Retailing System, exclusive the requirement of Operating System.

To improve the method of data communication, please refer to the followings:

1. Anti Virus applications
Anti Virus applications will automatically scan all files when AccPower Retailing System reads or writes the data each time. Therefore, the performance of AccPower Retailing System will be affected. Please close Anti Virus applications temporarily or exclude the database files (*.edbtbl, *.edbidx, *.edbbbl, *.edbcfg, *.edblog, *.edbcac) from scan lists.
2. System Restore
The database files of AccPower Retailing System may be included in System Restore of MS Windows. When AccPower Retailing System reads or writes the files, MS Windows will make a backup copy firstly. It slows AccPower's performance. It can be solved by these two methods:
 - a) Close System Restore Function
 - b) Create a separate and independent partition for the database files of AccPower Retailing System
3. The speed of Hard Disk
Normally, the faster speed of Hard Disk, the higher AccPower's performance. Please choose a higher speed of Hard Disk to enhance AccPower's performance. Regular maintenance of Hard Disk is definitely important.
4. The speed of network
If the data is placed in server and will be shared in the network, the speed of network is an important factor to AccPower's performance. Please seek for advises from your System Administrator or network vendor. There are suggestions:
 - a) Faster network card: 1000MB, 2.5GB or 10GB network card
 - b) Faster HUB: If possible, please choose switch that is better than HUB.
 - c) Quality of network card and switch: Data communication relies on the quality of network card and switch. There may be communication errors or even damage on data caused from bad quality of network card and switch.

- d) Qualified network accessories: There is an international standard of different network. For example, Ethernet 1000MB network requires the network accessories with Cat. 6 or above standard.

12.2 Notes to send reports by e-mail

12.2.1 The requirement for email software

AccPower Retailing System uses default email software of Operating System to send reports by e-mail. In order to use the email feature, your email software must be MAPI compliant. For example, MS Outlook and MS Outlook Express are MAPI compliant. Please contact the vendor of your email software to obtain more information about MAPI compliance. If you want to check your email software that is default email software of Operating System, please go to [Internet Options] in Control Panel.

12.2.2 Network cabling and email account

To send out an email, please set up network cabling and open an email account firstly. Otherwise, the email will be placed in [Out Box].

12.2.3 Not send out immediately

If the email cannot send out immediately, please check the following:

- a) Whether the network cabling is connected.
- b) Whether your email software can send and receive an email. Try to send an email to yourself. If you cannot receive the email, please check the setting of network cabling and your email account.
- c) For MS Outlook, please tick [Send Message Immediately] in [Tools]/ [Options] / [Send].

12.3 Information about Linux

If the Operating System in server is Linux, please note:

- a) Share the security permission of data folder for Read, Write, Add and Delete. For example, change the authority of data folder to 755 by using chmod command.
- b) Confirm Samba is 2.22 version or above.
- C) To avoid the problems caused database damage, please alter the content of smb.conf:
 oplocks = false
 locking = on
 level2 oplocks = on

12.4 Questions and Answers

18.4.1 Does AccPower support to display and record different countries' characters simultaneously?

Yes. From version 4.0, AccPower adopts Unicode (UTF8) standard. AccPower supports all Unicode standard characters, e.g. Traditional Chinese, Simplified Chinese, Japanese, Thai, etc., provided that your MS Windows supports to display and input by Unicode characters.

AccPower uses Arial as the default form. If some characters displayed by a square happened, it is just because Arial doesn't support this character. Please follow the below steps to change the form:

1. Open aps4.ini under the installation folder of AccPower. Default folder is c:\aps3000prov4.

2. Insert a new line under [Common]. Type "Font=" + the name of the form. For example:

```
[Common]
```

```
Font=Tahoma
```

If Font=Default is used, the default form of MS Windows will be applied. For MS Windows 7, the default form is Tahoma.

18.4.2 Why only part of the voucher or invoice (in the format of Computer Form) can be printed on the left side?

It is because your printer driver can't support custom paper size. Most default drivers of MS Windows doesn't support custom paper size. Please refer to the following solutions:

- a) The best solution is to ask your printer vendor for the driver supporting custom paper size.
- b) Change the paper size to the one your printer driver supported, such as A4.
- c) Create a new format. It is applicable to MS Windows 2000, XP, Vista and 7.
 - i) click Control Panel -> Printers and Faxes, select the printer by mouse
 - ii) In the printer windows, choose File -> Server Properties to create new paper size
 - iii) Set a form name, check the box for Create a new form, input paper size, click Save
 - iv) Click the OK button when finished
 - v) Select this new format in Report Designer

18.4.3 Why there is no response when the reports printed by multifunction printer?

It is because the drivers of these multifunction printers don't support Letter Size paper. Please change Paper Size to A4 in General page of [System Setup].
